

Edit wherever you are with Casablanca Liberty.

Casablanca Liberty is MacroSystem's first portable digital video editing system with a built-in monitor! But this isn't just any monitor - we have partnered with Toshiba electronics and have implemented Liberty on the Toshiba notebook with a swivel touch-screen.

With this touch-sensitive screen you can swivel it around to display your work or you can flip it around and down to that you can use the accompanying stylus to edit right on your lap! Of course, you can use the built-in touchpad, integrated keyboard or connect a trackball.

The Liberty does not sacrifice performance for portability as it is built with the Intel Dual Processor with results on par with the Renommee. In addition to the creative power associated with video editing in the Smart Edit environment, Liberty provides an additional benefit - upon boot-up, you can choose to launch either Smart Edit or the Windows operating system! On the Windows side, Liberty features many excellent functions specifically for the touch-screen environment under Windows XP Tablet Edition - with features like the finger print recognition for security and more. The Casablanca Liberty includes a Dual-Layer DVD drive for authoring DVDs, burning CDs and sharing media through the Disk Transfer software, as well as a fully functioning Ethernet port.

Liberty ships with Smart Edit 6, providing you with even more exciting features as well as your choice of editing in Standard Definition or HDV. Another excellent advantage of the Casablanca Liberty is Toshiba's full worldwide warranty on hardware of three years. MacroSystem of course handles all things related with Smart Edit and the system is pre-installed.

- Mobile Casablanca system with breathtaking power for DV and HDV video editing.
- Usable as both Casablanca editor and Windows XP computer.
- Touch sensitive screen for total control using the wireless stylus pen.
- Additional control using integrated touch panel and keyboard.
- Output directly to DVD using the integrated DVD burner with Dual Layer technology.
- Flexible connectivity.
- SMART EDIT editing software version 6 for professional and user-friendly editing.
- SMART RENDERING: Automatic background rendering of effects.
- DVD Arabesk 3 DVD authoring.
- Windows XP Tablet PC Edition.
