

Advanced Video Editing Made Friendly and Affordable.

Casablanca AVIO DVD

BRING YOUR IDEAS TO LIFE

Create professional-quality video productions quickly and easily with the affordable Casablanca Avio DVD digital video editor. An all-in-one solution, the Avio DVD combines stunning video quality with legendary ease of use. Just plug in your video monitor, camera and deck and you're ready to make great movies!

No computer is needed, and the system includes everything required to record, edit and output high quality video projects to DVD, DV or VHS.

SMART EDIT 4: PERFECT FOR HOME, SCHOOL, CHURCH AND PROFESSIONAL USE

Avio DVD is easy enough for grade school children to use, yet powerful enough for commercial broadcast television. The Avio's SMART EDIT 4 software is simple on the surface but contains the depth of capabilities to meet the complex demands of commercial videographers and corporate video production departments. Yet, Avio DVD is so affordable, it is perfect for home use to create video scrapbooks, family holiday DVDs and tribute videos.

PROFESSIONAL QUALITY RESULTS

Record your footage from your camera and work completely in Native DV quality levels to guarantee lossless results. Perform highly accurate, frame-precise video editing, including realtime 2D transition effects, image-processing effects (filters) and titles.

VERSATILE STORAGE AND OUTPUT OPTIONS

The 80 GB hard drive (upgradable to 250 GB) gives you plenty of storage, and the DVD burner lets you burn your finished project to DVD-R or DVD-RW. The Arabesk 2 DVD Authoring package allows you to add chapters and menus with variable motion backgrounds and titling options.

EASY TO LEARN AND USE, BUT LOADED WITH AS MUCH POWER AS YOU NEED

Built on years of experience producing the best non-linear editors in the industry, Avio DVD's performance is rock-solid, and it is compatible with a large array of add-on software and hardware packages with more coming every day.

TAKE A CASABLANCA HOME FOR A FREE TEST DRIVE

Find a participating Test Drive Dealer at www.casablanca.tv and take home a Casablanca to Test Drive in *your* studio with *your* footage, at no charge!

NOW WITH MORE INCLUDED SOFTWARE FOR MORE POWER AND VALUE!

Every new Avio & Avio DVD unit now includes Fonts 1-4, Effects 1-4, & Presentation Options, to allow you to create more freely than ever before. Sold separately, those packages are worth over \$700!

EDIT

The video footage you record into Avio DVD is automatically placed in the scene bin. You can split your footage into smaller scenes, or select new in and out points for the scene to begin and end with. Name scenes as they're created and trim them with single-frame precision.

Then add exciting effects like slow-motion and reverse-motion. You can add any scene to the storyboard in the order you wish and change or delete scenes at will.

Add Avio Pro for unlimited multi-layering of scenes, effects, titles or transitions.

TITLE

Avio DVD comes standard with a powerful titler that has scrolls, rolls, fading titles and all the options you need to quickly add professional titles to your projects.

Archive frequently used titles for easy retrieval for use in multiple projects to avoid repetitive typing.

A ton of available fonts and effects options makes the titler an incredibly versatile tool to express your individual creativity.

AVIO PRO

Add Avio Pro to further enhance your Avio DVD's powerful capabilities:

- 10 projects
- 6 stereo audio tracks
- Scrub Audio
- Clipboard to transfer video and audio scenes between projects
- Unlimited multi-layering of effects
- Full-screen frame-by-frame preview with on-screen controls
- Scene creation from multiple scenes
- Add it to your Avio DVD for only \$199 if you purchase them together!

TRANSITION

With the click of button you can add real-time 2d transition effects like crossfades and double exposures, and play them instantly. Or use transitions with more variables like picture-in-picture or chromakey to quickly and easily add a professional edge to your productions.

Numerous add-on software packages are available: a fully loaded Avio DVD has literally thousands of different transition options.

Avio DVD also has hundreds of Image Processing effects available, to help fix bad footage, or create exciting special effects.

MIX AUDIO

Add audio in either of the two additional stereo tracks (or add Avio Pro for a total of 6).

Import music directly from CDs almost instantly, place audio clips with frame accurate precision and adjust the fade-in, fade-out levels with visual volume and fade display.

You can make minute corrections to other audio tracks quickly and easily, no matter what the situation.

features

- Complete standalone system allows use with either a single video monitor or with a video monitor plus a high-resolution VGA monitor
- Powerful SMART EDIT 4 software
- High-speed processor with dual-streaming for realtime creation of 2D transition effects and audio dubs
